THE GM RADIO MARKETING PROGRAM

A program to Help GM Dealers achieve added sales and greater profit potential in the growing market for premium sound systems.

The key to the program is enabling dealers to better capitalize on the advantages of having factory installed Delco sound systems in all their vehicles. How? By greatly increasing the dealers' ability to maintain an adequate stock of radios for upgrading and service exchange purposes.

The Delco program is YOUR program — We asked dealers across the country to tell us what kind of program would best satisfy their needs . . . The new SOUND SELLING program is a direct result of that survey.

To gain the maximum advantage and profit potential from the Sound Selling Program, dealers begin by following two radio marketing fundamentals:

- Ordering all vehicles with a factory installed Delco sound system, which complements the level of each unit's basic trim and other optional equipment.
- Taking advantage of the Program's improved support tools and sales policies, by stocking and maintaining an adequate inventory of sound systems for needed product flexibility at the point of sale.

Following are the terms, policies and features which have helped make the Delco Sound Selling Program a proven winner. Utilized to the fullest, the Program can assure you of new sales and profits, greater convenience, and improved customer satisfaction.

1. 20% Discounts Plus Rapid Direct-Ship Delivery

When 6 or more radio packages are ordered through DIAL DELCO (your toll-free factory access number), a 20% discount applies. This permits dealers to profitably stock and serve customer preferences, by on-the-spot upgrading of factory installations.

Rear seat speakers and installation kits also receive the 20% discount when placed with orders for 6 or more radios through DIAL DELCO. Orders for less than 6 radios, and orders for kits only must be placed through PDC or AC-Delco Service/Sales Centers. (20% discount does not apply).

2. Direct Order Placement And Assistance

To assure that required systems and installation kits are in Dealer's inventories when needed, Delco has established a direct-dial, toll-free "800" number known as "Dial Delco"—800-428-0501 (Indiana, 800-382-0531). These numbers are answered 24 hours a day.

Orders are shipped within 24-48 hours direct to you. DIAL DELCO is your factory access for questions on parts, service, or selling aids.

3. Terms And Inventory Adjustments

Dealers are eligible for 90-day payment terms on any Direct-Ship Order of 6 or more radios.* This 60-day extension of normal billing terms, combined with the radio return policy described in Feature 4 below, allows a proper inventory to be maintained and rotated well within the 90-day period. In addition, if the inventory of current model dealer radio packages is found to be in excess of the needs of the dealership, the dealer may contact Delco Electronics to arrange for a return of the excess stock of radios purchased under this program.

*Standard 30-day terms available upon request.

4. One-For-One Return, For Inventory Protection

Dealers may return radios to Delco Electronics for credit at any time*, the only requirement being that an equal number of new radios must be purchased through DIAL DELCO or a GM Parts Division "PDC".

Kits (rear speakers, upgrade and installation) in unopened (factory-sealed) packages may also be returned, provided an equal number of new kits are ordered — one rear speaker kit for each rear speaker kit may be returned, etc. . . .

The one-for-one return policy allows dealers to replace units which are not readily saleable. (The 1979 return forms are available from your local GM Parts Division office.)

*Watch for year-end deadlines; noncarryover 1978 models (radios and kits) must be returned by December 15, 1978.

5. NOW Same-Day Customer Service

Dealers can supply same-day service to their customers by maintaining a stock of radios for on-the-spot exchange with the customer's defective unit. The defective unit can then be sent to an authorized AC-Delco repair station. The repaired unit can either be returned to the dealers stock of service radios or be returned to Delco by means of the one-for-one return policy.

To supplement your "instant service stock", dealers may exchange their defective radios at any AC-Delco Service Exchange Center.

In addition, many of these Centers now maintain a stock of Delco radio packages and kits for quick sale to dealers when unforeseen sales opportunities arise.

6. Sales Support

• Radio Business Counseling From Delco Radio Field Specialists

A single point of contact for Dealers on all radio matters is provided by these specialists working with car divisions, GM Parts Division, AC-Delco Division and AC-Delco Service/Sales Centers to help Dealers establish and maintain profitable radio programs.

• Delco-GM Dealer Radio Business Manual

The Radio Business Manual (called **Sound Facts**) contains a wealth of information on Delco-GM radio buying, selling, installing, and servicing; as well as application data, installation techniques, etc.

This manual is published in a three part format.

—Sound Facts Salesman's Guide

This is a convenient pocket-size booklet with valuable sales information on radio product features, benefits, availability, glossary of radio and speaker terms and general information about radio operation.

—Sound Facts Parts Guide

Provides information to help your parts department.

—Sound Facts Service Guide

Provides information to help your service department.

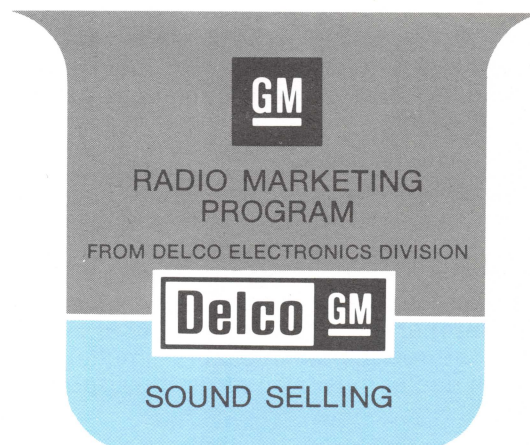

• Advertising

Frequent Delco advertisements in popular publications keep the public aware and interested in the superior quality of Delco Sound Systems. In addition, radio commercials and car division advertising help you sell the "Sound of General Motors."

(Watch for the **Delco GM** trademark).

Contact your car division district manager or GM Parts Division district manager for information to help you derive the full benefit from Sound Selling. In addition, your AC-Delco representative or a Delco Radio field specialist is available to assist you with your radio questions.

(Indiana dealers 1-800-382-0531)

Sound Selling

DEALER INSTALLED SOUND SYSTEMS

The Dealer-Design Packaging separates the Delco-GM radio receivers from installation parts so that fewer packages are required to cover the full line of cars. This allows broader coverage with reduced inventory investment.

Receiver (Radio) Package The receiver package usually contains just the radio unit and a warranty card. Some receiver packages, however, contain extra items. Examples are:

- A. Radio tapes—demonstration tape
- B. Digital radios—extra harness and slide chart
- C. Cadillac AM-FM Stereo CB—installation parts for mounting transceivers.
- D. All AM-FM Stereo CB tapes—installation parts for mounting transceivers.

Installation Package The installation package contains the hardware necessary to duplicate a factory installation. A typical package includes brackets, screws, harness assembly, knobs, and front speakers. (Does not include radio unit, antenna, or rear seat speakers.)

Upgrade Package The upgrade package contains the hardware necessary to upgrade a vehicle already equipped with a factory installed monaural radio to a stereo radio. (Does not include stereo radio or rear speaker(s).)

Rear Seat Speaker Package The package contains all parts necessary to install a rear seat speaker such as the harness, wire assembly, grille, and the speaker. There are two types: the first, containing just one speaker, which is used for both monaural and stereo units requiring only one rear speaker, the other is the stereo rear speaker package containing two speakers for installations requiring two rear speakers.

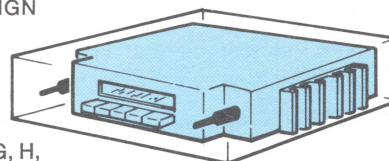

Fader Control Package This package contains the fader control which is used only with a monaural system and a dealer installed rear seat speaker. However, if the rear seat speaker is installed at the factory, the fader is built into the factory installed radio. By turning the fader control the sound can be directed through either the front speaker, rear speaker, or through both speakers simultaneously. In addition, a dealer must also order the appropriate fader knob.

Fader Knobs This knob must be ordered when adding a fader control and a rear seat speaker to a monaural radio. It must also be ordered when

upgrading a monaural radio to a stereo radio and no upgrade package is listed.

Radio Return Instructions Instructions for returning radios to Delco Electronics appears on the radio return form. Please follow these instructions and any other instructions received by bulletins.

 - 1. Receiver Package
 - 2. (AM-FM-CB) also required-Fader Knob and Rear Speaker Package
 - B. Monaural to Stereo**
 - 1. Receiver Package
 - 2. Upgrade Package or Fader Knob
 - 2. Rear Speaker Package
 - C. Stereo to Stereo**
 - 1. Receiver Package

*Assuming the vehicle has been purchased with the windshield antenna option.

1978-79 Radio Interchangeability Chart

To use the Interchangeability Chart, follow these instructions:

- Find type of radio. Example: AM
- Find car or truck division and body style. Example: Buick A.
- Find 1978 package number under 1978 and 1979 number under 1979. Most package numbers are the same for both years. Example: AM Buick A uses the same receiver for 1978 and 1979—995989.
- Some receivers do not have direct replacements. Example: AM/FM stereo digital Cadillac C & D 1978 number is 996003; 1979 use AFE—AFE is an AM/FM stereo with digital readout that is electronically tuned.

Delco
Universal Mount
Tri-Band (AM/FM/CB)
Power Antenna Package

Dealer Installed

- **Complete Package**

- Including Antenna Mounting Brackets, Escutcheon Mounts, Wiring and Switches.

- **Fully Automatic**

- Extends and retracts when radio is turned on and off.

- **Design Features**

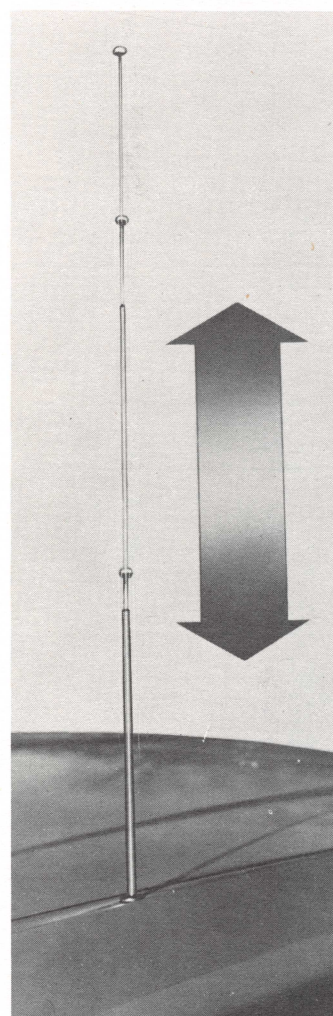

- Unique current sensing switch allows the fully automatic feature to be used with any radio.
- Permanent magnet motor for low current consumption and light weight.
- Less directionally sensitive than windshield antenna.
- Center loaded CB coil with in-line splitter box.

- **Sales Features and Consumer Benefits**

- The Power Antenna helps provide the owner with fine radio reception—offering a much greater range than the windshield antenna.

- When not in use, the Power Antenna can be completely retracted to protect it from any damage or vandalism.
- Quiet and positive operation is the trademark of the Delco Power Antenna.
- The Tri-Band Power Antenna is a SINGLE antenna that provides AM-FM-CB functions—eliminates need for multiple antennas.
- Eliminates the extra “ADD ON” CB antenna—location, mounting and lead routing are eliminated—because they are factory installed.
- When not in use, the Tri-Band Antenna retracts and does not “FLAG” the vehicle as CB equipped—ANOTHER major theft deterrent feature.

Delco
Universal Mount

● Late release. Check availability.

NA = Not Available. ♦ Not necessary, but can be used if 4-speaker system is desired.

NUMBERING SYSTEMS

There are different numbering systems that the dealer and his people will come in contact with when working with the radios. They are: the new order option number (U number), the GM part number, the Accessory Package Number, and the Service Reference number.

Factory Installation Option Codes

This is a three digit alpha-numeric code used by the dealer on his new car order forms. It represents an attempt by the car divisions to standardize the ordering of radio types. As an example: a UY8 is the AM/FM Stereo Digital Radio with Clock and Date for Buick, Oldsmobile, Pontiac, and Cadillac while a U63 is the AM radio for Buick, Chevrolet, GMC Truck, Oldsmobile and Pontiac.

Dealer Accessory Package Number

This six digit number is assigned to the accessory package or kits by the General Motors Parts Division.* These packages are logical groupings of parts and the instructions required to perform the job. In addition, these numbers are used by the dealers to order and return radios, installations and/or upgrade packages. Typical examples of these numbers include: 995989, a radio receiver package and 995752, an installation package. The dealer package numbers and their contents are identified and illustrated later in this section. This number will appear on all 1978 radios and should be used as the returned package number.

*(Some TRUCK PACKAGES have seven digit numbers that are assigned by the Truck Division.)

General Motors Part Number

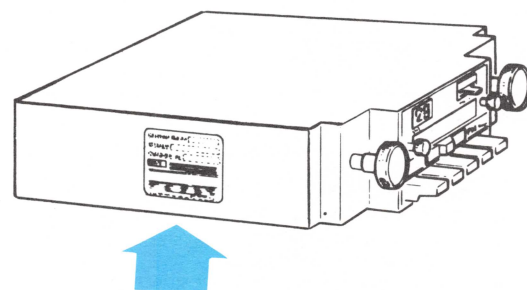

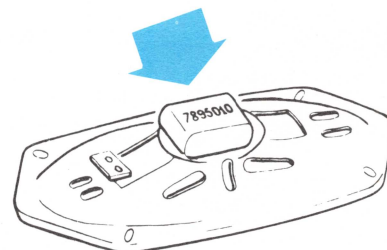

This is the seven or eight digit number assigned to each and every GM part. Examples of products which would use these numbers include speakers, harness, packing lists, and receivers. A typical example of this number is 7895010 which is the number for a Delco speaker assembly. In the case of Delco receivers, this number is found on the radio identification sticker or label, and is identified as the FCC Data Model Number.

Radio Service Reference Number

This is a 6 to 8 digit alpha-numeric number assigned to the various Delco radios for service purposes. It is most useful to car dealers and other field people in identifying the type and application of any "Loose" radio. Also, use this number when communicating with the radio service center. This number can be found on the top of the radio identification sticker or label which is attached to each Delco receiver. As illustrated on page 21, the label has changed slightly over the years, but it still contains the same type of information.

Warranty Return Card

This card is included in each receiver package. It is used by the Car Division to update their warranty records and must be completed whenever the type of radio is changed in an automobile.

This Card MUST Be Completed and Returned to Update Your Car Division Warranty Records. R & R Will NOT Be Paid Unless This Card is Returned.

- GMPD Dealer Code: [] [] [] [] [] [] [] [] [] [] Date of Installation: [] [] [] [] [] []
- This Radio was Received From: GMPD ☐ Direct Ship From DELCO Kokomo ☐ Check One
- This was a New Radio Installation ☐ This Upgraded a Factory Installed Radio ☐ This was used as a Service Exchange ☐
- V. I. NUMBER of the Vehicle the Radio is Being Installed In: [] [] [] [] [] [] [] [] [] []
- SERVICE REFERENCE NUMBER of radio Being Removed: [] [] [] [] [] [] [] [] [] []
- PACKAGE NUMBER of the new Radio (6 Digit Number Printed on the box): [] [] [] [] [] []

PLEASE DO NOT FOLD STAPLE OR MUTILATE THIS CARD 16001681

2 The second digit of the model code indicates the car division. The car division code for 1979 is:

- 0—Corporation
- 1—Chevrolet
- 2—Pontiac
- 3—Oldsmobile
- 4—Buick
- 5—GMC
- 6—Cadillac

3 The third, and sometimes fourth, indicator in the service reference code is used to indicate the predominant car body style in which the radio is used.

4 The next group of indicators is used to indicate the radio model. The code for radio models in 1979 is:

PB	AM
PBK	AM with FADER
FP	AM/FM MONO
FPK	AM/FM with FADER
PBT	AM Radio/Tape
FM	AM/FM Stereo
FMT	AM/FM Stereo Radio/Tape
T4	Tape Player
FCT	AM/FM Stereo Radio/ Cassette Tape
FPC	AM/FM MONO/CB
FTC	AM/FM Stereo/Tape/CB
FMD	AM/FM Stereo/Digital Display
FMC	AM/FM Stereo/CB
CB	Remote CB "Slave"
ETR	Electronically Tuned AM/FM Stereo/Digital
ETT	ETR/Tape
ECT	ETR/Cassette
CT	Cassette deck
ECB	ETR/CB
ETC	ETR/Tape/CB

1 The first digit of the model code indicates the year of production.

**GENERAL MOTORS CORP.
DELCO ELECTRONICS DIV.**

FCC DATA MODEL NO. GM 1400
THIS DEVICE COMPLIES WITH FCC RULES
PART 15 AS OF DATE OF MANUFACTURE.

SERVICE REF. NO. 91 TFM1

PART NO. 16001381

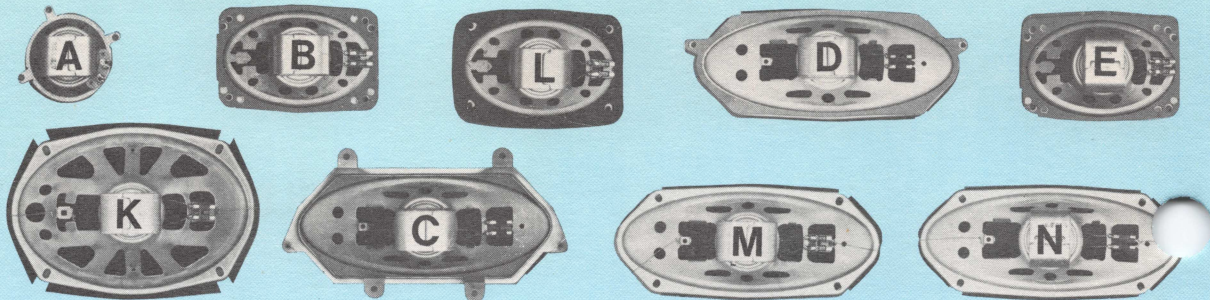

RETURN NO. 995678

SERIAL NO. 00000000

Delco GM KOKOMO, IN 46901
PRINTED IN USA LABEL NO 16002179

6 This number is to be used on the return form when returning receiver to Delco Electronics.

5 The last indicator in the service model number is needed by the radio service center to match up service data for that model.

Radio Service/Sales Centers

A nationwide network of Delco-GM radio service/sales centers have been stocked with a limited quantity of exchange radios. These radios are furnished to the centers enabling them to perform the necessary warranty repairs without unnecessary delay to the dealer and/or customer.

This exchange service should not be confused with the type of service available through the dealer stocking program . . . which provides for immediate customer exchanges. However, the two service plans were specifically designed to complement each other so that the dealer can perform outstanding customer service time after time.

Most of the Delco-GM radio service/sales centers shown on the territorial map/listings offer consistent and competent repairs or exchanges within 24 hours. For dealers who ship radios to the centers, the following schedule is common:

- Working Day One — Dealer ship radio to center.
Working Day Two — Center receives radio from dealer.
Repaired or exchange radio shipped back to dealer.
Working Day Three — Dealer receives serviced radio.

Of course, individual dealers will experience various conditions. Each dealer should investigate and evaluate the radio repair options that are most convenient for his particular needs.

It is recommended that every dealer develop a personal working relationship with one or more of these radio service/sales centers. Incidentally, all centers are backed by factory training and guaranteed service.

Improvement Program

In cooperation with AC-Delco, a Service/Sales Center Improvement Program has been adopted to share aggressive business methods among the centers. Concentrating on management and administrative matters, this program has shown positive results in expanding the influence of these authorized warranty service centers.

In addition to offering qualified technical competence, these centers are beginning to place more emphasis on developing stronger car dealer relationships.

Further steps to support Delco-GM's total service program are underway, including an increase in the number of service/sales centers across the country.

Field Service Engineers

A team of traveling service engineers have been strategically located around the nation to provide direct factory representation to the field level.

These engineers are technically oriented to fulfill the assignment of training, evaluating and continually assisting the repair center network with radio and radio system problems.

Upon request, Delco's field engineers are available to assist zone and district personnel with special radio situations.

DIAL DELCO

FOR RADIO EXPERTISE
*on questions regarding Radio
Sales, Service, Parts or Delivery*

24 HOUR AVAILABILITY—TOLL FREE

DIAL **1-800-428-0501**

INDIANA DEALERS

DIAL **1-800-382-0531**

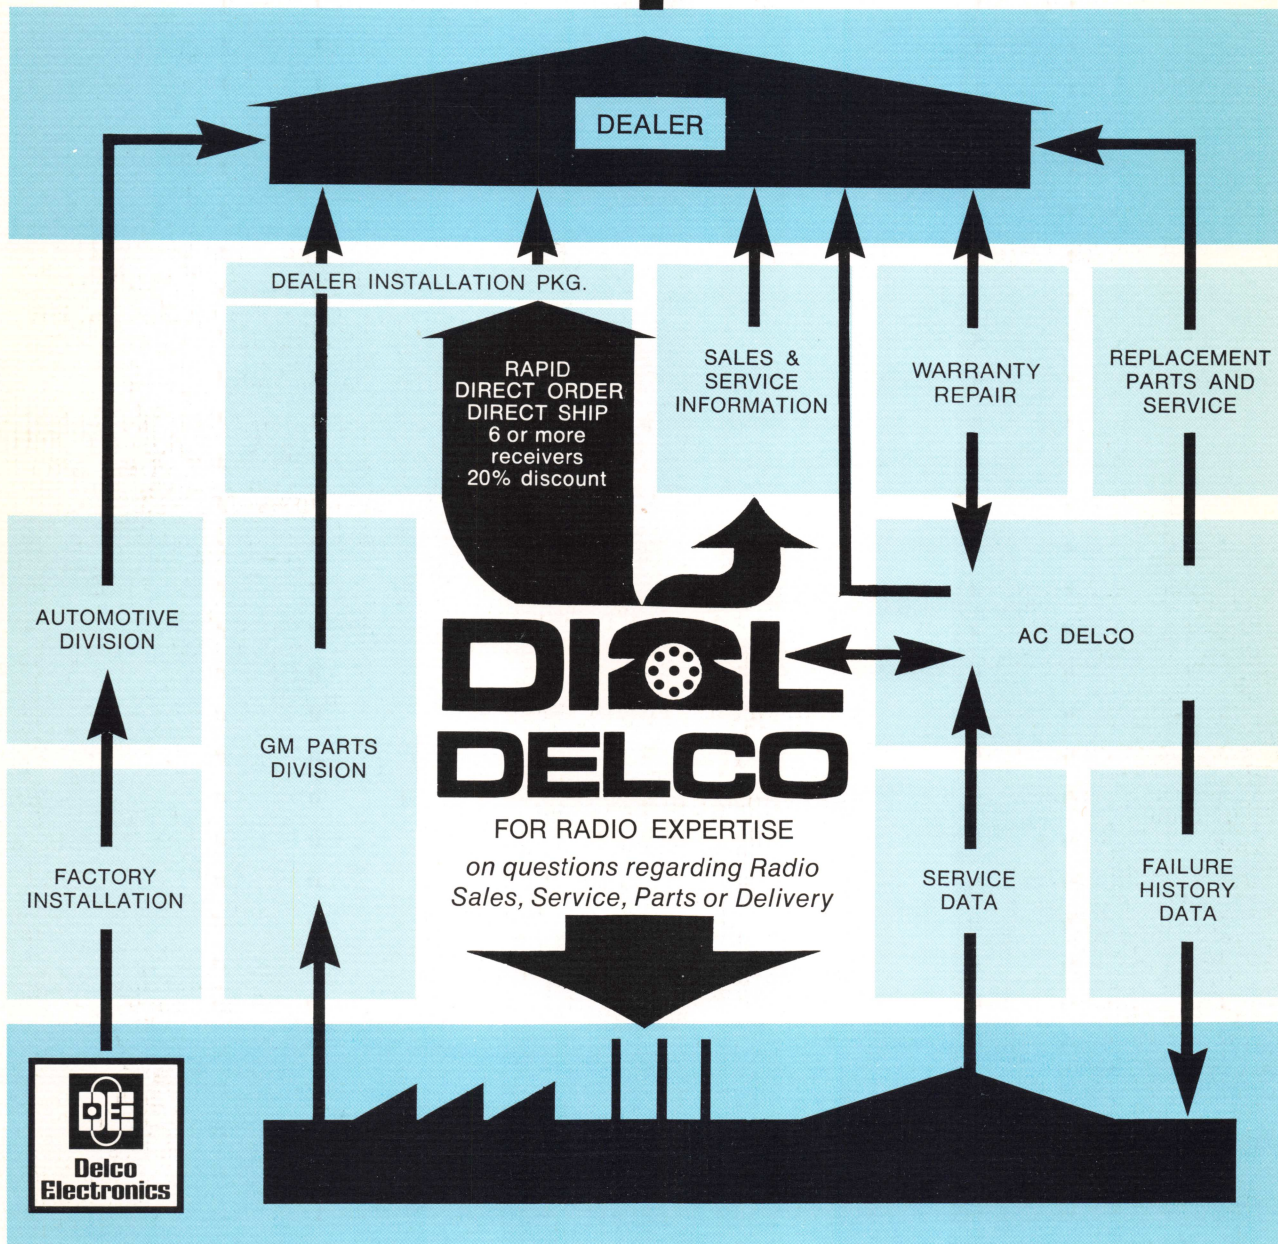

DIAL DELCO Delco maintains a toll free number that enables the dealer to get help on any Sales, Service, Parts, or Delivery problems or questions. This phone is strategically placed in the Delco Electronics facility at Kokomo, Indiana between the sales and service departments with direct access to engineering, shipping, and billing departments. As a result, the dealer is never more than a free phone call away from an answer to any question or problem concerning "The Sound of General Motors".

SERVICE LITERATURE:

Delco has a variety of service aids available to help dealers and customers better understand the performance and maintenance features of Delco radios. For additional information about service literature, or to request copies for your dealership, **DIAL DELCO**.

Delco **GM**

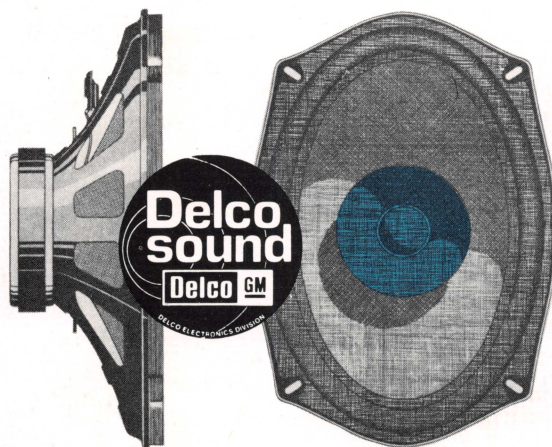

Delco **GM**

A SOUND IDEA FOR 1979

The "Delco Sound" Dual Cone Speakers

Delco now makes home high fidelity sound available
in your new General Motors vehicle.

You'll hear those elusive highs... the deep lows...
and the midranges loud and clear.

- Acoustically designed for your GM vehicle.
- Two 6" x 9" dual-cone extended range speakers—
ideal for rear deck installation.
- 25 watts of power handling.
- Frequency response—55 to 20,000 Hz.
- Dial Delco about the "sound" idea from
Delco-GM.
