CHEVY TRUCKS

CHEVY IS THE POWER IN TRUCKS.

A totally new V8—the 6.2 Liter (379 Cu. In.) Diesel. Available in 2WD and 4WD full-size Chevy Pickups, Suburbans and Chassis-Cabs, and 4WD Blazers.

This made-in-America V8 engine, designed and manufactured specifically for trucks, has the traditional fuel-economy advantages of diesel over gasoline. And extensive testing also indicates that the 6.2 Liter Diesel can handle heavy loads, as well as stop-and-go traffic. Simply put, this new V8 presents a powerful case why you should go diesel.

Economy. You get more miles per gallon, using traditionally lower priced fuel. For example, a full-size '82 Chevy Pickup with this V8 diesel engine has higher projected mileage ratings than any 1981 6-cylinder or V8 truck.

Power. The new 6.2 Liter V8 Diesel delivers plenty of torque or low-end power. A properly equipped full-size '82 Diesel Pickup or Suburban, for example, can haul as much as 13,500 lbs. including itself, trailer, passengers, cargo and equipment.

Test drive it. The 6.2 Liter Diesel—379 cubic inches of tough-towing, big-hauling, hardworking, fuel-sipping power. It is big news, and it gives Chevrolet the widest selection of light-duty diesel-powered trucks in the industry.

Some Chevrolet trucks are equipped with engines produced by other GM divisions, subsidiaries, or affiliated companies worldwide. See your dealer for details.
